

OPTI NEWS

Speed up your load-out rate with Scissor Lifts.

Optimum Handling Solution Scissor Lift Tables can result in increase in load-out rates when utilised to their maximum capacity.

When despatching finished goods, food and beverage manufacturers can measure real benefits from implantation of Optimum Handling Solutions Scissor lift tables.

The common load-out room conveyor continually feeds the packaged products to the operator, who loads them onto pallets for dispatch.

When fitted with the Logic lift photo eye the scissor lift automatically maintains a comfortable working height platform to reduce back strain and the bending and stretching injuries are often associated with the stacking of pallets.

The low profile scissor lift table can also be utilised where forklifts are not accessible.

Contact Optimum Handling Solutions to discuss your conveyor, scissor lift or other materials handling requirements.
