

Pal-Tec Custom Raised Work Platforms

OVERVIEW

Optimum Handling Solutions can design and build a Palletising Station or Raised Work Platform to suit your operational needs.

We have extensive experience in supplying work platforms for single or multi user palletising stations as well as custom raised work platforms.

Custom units vary from single to multi-user palletising stations, with raised work platforms, conveyors and pallet scissor lifters in mild powdercoated steel, galvanised or full stainless steel. The heavy duty construction is low maintenance - high performance.

Speak to one of our sales team to discuss your palletising station needs.
