DOCK-MATE Loading Dock Lifts

OVERVIEW

Available in 750kg to heavy duty 3500kg units, and up to 1300mm high, we can provide an economical solution for loading or unloading of goods for loading dock and warehouse applications. Ideal for pallets, trolleys and goods using pallet trucks, forklifts or hand loading. Truck to dock loading, with optional kickdown ramp, makes manual truck unloading/loading from dock level efficient and safe

DOCK-MATE loading dock lifts can be pit mounted or mounted on ground level, with a custom ramp option.

Optimums DOCK-MATE lifts are available with custom platform sizes and lifting capacities to suit a wide range of loading dock applications.

DOCK-MATE Bin-Lifters

OVERVIEW

Optimum Handling Solutions custom DOCK-MATE Bin Lifters are an ideal solution for the transfer of bins from one level to another, providing an efficient and safe working environment. Simply wheel bins on and off at each level, minimising the manual handling of heavy bins.

Available in both pit mounted or floor mounted, with optional ramp the DOCK-MATE Bin Lifter can be fitted with full rails and gate, or simple chain gates, according to your requirements.

Optimum can provide a custom solution for a variety of bin types and dock heights, up to 1300mm.

Cahill Gardens Apartment, Walli Creek

DOCK-MATE Low Profile Dock Lift

OVERVIEW

Optimum Handling Solutions range of DOCK-MATE low profile dock lifters are designed to improve the safety and efficiency of your loading dock. The low profile dock lift is an ideal solution for loading or unloading of goods for loading dock areas with limited space, up to 870mm high. Ideal for pallets, trolleys, and goods using pallet trucks, forklifts or hand loading.
