

Pal-Tec Double Acting Pallet Gates

OVERVIEW

Optimum's Pal-Tec Pallet Gates are a great way to create safety barriers for entrance ways on mezzanines and other elevated work areas, whilst still allowing efficient pallet movement.

Designed to move goods, via forklift, to upper mezzanine levels, the Pal-Tec Double Acting Pallet gate design, ensures that staff and goods are always protected from falls.

The Pal-Tec Double Acting Pallet Gate is available in both powder coated or stainless steel.

The Pal-Tec pallet gate suits standard pallets up to 2000mm high, with custom double pallet option available

- ✓ Gas Strut assisted, for light and easy operation
- ✓ Side safety panels - 1400mm wide x 1050mm high
- ✓ Quality construction ensures low maintenance
